Education

Bath, England	University of Bath	10/2025 - Present
• MSc Computer Science • Dissertation: AI-Assisted Generation and Interactive Exploration of Causal Loop Diagrams from Future Scenario Narratives (Industry Project with DAS) • Relevant Modules: Software Engineering, Software Development, AI and Machine Learning		
Southampton, England	University of Southampton	10/2021 - 06/2024
• BSc (Hons) Computer Science • Dissertation: Artificial Intelligence Techniques for Inheritance of Lost Arts • Relevant Modules: Machine Learning Technologies, Intelligent Systems, Cloud Application Development		

Employment

Software Developer	Aseto - Larnaca, Cyprus	10/2024 - 09/2025
• Engineered backend logic for Aseto's AI Voice Agent, automating inbound and outbound communication with Python ML frameworks such as LlamaIndex • Designed and maintained modular Python microservices, including a Text-to-Speech service critical to the conversational AI pipeline • Built and launched the company's marketing and operations platform using Next.js, ensuring scalability, responsiveness, and high performance across devices • Developed and integrated robust APIs in ASP.NET, enabling communication across services and supporting key features of the AI assistant • Managed and optimised PostgreSQL databases, performing data cleanup and schema improvements to enhance system performance		
Junior Software Engineer, Intern	Azul Systems - Limassol, Cyprus	07/2023 - 09/2023
• Worked with a team to create a Java grammar visualizer web application to be used internally within the company • Implemented features such as syntax highlighting, search functionality, and directed acyclic graphs to visually represent complex relationships between hundreds of grammar files		

Awards

ESBF Competition	University of Bath	05/2026
• Awarded 1st place and £3,000 prize in the Engineers and Scientists in Business Fellowship (ESBF) Innovation Competition as part of the Entrepreneurship module • Collaborated with a team to conceive and pitch 99NOW, a next-generation emergency communication platform proposing to modernise the 999 system with live video, digital reporting, and AI-assisted risk assessment		

Languages and Technologies

- Natural Languages: Greek (Native), English (Fluent)
- Programming Languages: Python, JavaScript, C#, Java
- Frameworks: ASP.NET, Next.js, Express.js, LlamaIndex
- Tools: Git, Microsoft Azure, Docker
